We know both Bob Starr and Jimmie McCranie personally. These are definitely NOT the "Ray Lampley type". Bob was on JJ's shortwave program Wednesday night and told him that an FBI contact had warned him that there was a threat to his life. We will get a copy of that tape.

CNN has already rescinded the Olympic connection, and has now begun their "Oh my Gawd... domestic terrorists... Tim McVeigh... OKC bombing ...Turner diaries... round 'em all up" song and dance.

This crap stinks and it's only the beginning.

Am in contact with Nancy Lord and will keep the list appraised of any new information.

Heads up, everyone.....

While you may have known these folks personally, obviously they did not trust (thankfully so--had you known the Feds may have had a warrant for you to!) you enough to tell you that they enjoyed making and stockpiling highly illegal pipe bombs and other explosive devices.

Let's face it, the Feds have sources in militias, the Feds love to wait for some fool or fools to build bombs, stockpile illegal class 3 weapons, so

that the Fed's spies can inform on them. Then they can arrest these folks, display all the bombs and so forth, then tar and feather everybody who is connected to the Constitution, Second Amendment, and Militias with the same brush.
